waichigovick@gmail.com

## SUMMARY

A results-driven and versatile QA engineer with over 5 years of experience in manual and automated testing, dedicated to ensuring top-tier software quality. Skilled in test management, process optimization, and driving quality assurance from initial planning to successful deployment and releases. Proven experience in leading QA teams and enhancing testing strategies in dynamic, fast-paced tech startup environments.

## EXPERIENCE

### Workpay, Nairobi — Senior QA Automation Engineer

August 2023 - Present

- Built the UI automation framework with Playwright for the core HR product from scratch, this helped capture UI issues during migration and cut down the time taken to find UI issues by 50%.
- Built an API test automation framework with Playwright which helped capture bugs on the backend APIs and accelerated the release of new loans, expense and wallet features to the market on time.
- Integrated automated test reports with email, AIO and Slack, increasing the visibility of QA efforts across the engineering team.
- Created test dashboards with test beats and grafana to make test metric analysis easier for the managers and engineers. now a trusted tool for assessing platform stability.
- Migrated the test management process of the company from Excel to AIO and trained the team on how to leverage AIO for test cases and test execution.
- Held training sessions with the QA team members to share knowledge on test automation and quality assurance processes. All the team members are

## SKILLS

- Playwright
- Cypress
- Selenium
- Appium
- K6
- Postman
- Automation
- Java
- Javascript
- Python
- Docker

## LANGUAGES

- English (Proficient)
- Swahili

- currently writing automated tests in different capacities.
- Championed for the creation of process and technical documentation of our system which grew the number of engineers with context of how the whole platform works by more than half, driving better collaboration.

## **Kyosk Digital Services, Nairobi — Software engineer in Test**

November 2021 - August 2023

- Built an automation framework with codecept that significantly improved product release cycles by enhancing regression test reliability.
- Led testing and validation of ERPNext integration, ensuring smooth, issue-free deployments and releases.
- Developed training materials on confluence, including videos and documentation, to streamline onboarding for new team members.
- Led the testing for the v2 platform, delivering well-documented test cases and tracking all issues in Jira.
- Established QA team SOPs, defining standardized workflows and best practices.

## **Techno Brain Group, Hurlingham — Software Test Engineer**

February 2020 - November 2021

- Led a team in testing the performance of Microsoft Edge, benchmarking web app load times against competitors.
- Participated in Windows 11 release testing, ensuring application compatibility before launch.
- Set up Windows test beds on bare-metal machines for comprehensive application compatibility testing.
- Contributed to early-stage testing of Microsoft Azure, evaluating app performance on cloud infrastructure.
- Conducted testing on Azure identities, compute resource deployment, and management.

## **Sohn and Sol, Nairobi — Technical consultant**

January 2020 - November 2021

- Reviewed technical documentation and provided recommendations for implementation strategies.

- Assessed tender documentation and advised on technical feasibility.

## EDUCATION

**Moringa School, Nairobi** — *Diploma in software engineering*

June 2019 - November 2019

**Jomo Kenyatta University of agriculture and technology, Juja** — *Bsc. Information technology*

April 2016 - 2020

## VOLUNTEER EXPERIENCE

**RED-p Kenya** — Volunteer at Red-P

February 2020 - Present

- Responsible for running data clean up for more than 200 students on our scholarship when schools close for the holidays, initiating payments for the school fees and sharing the receipts with the parents.
